| - Firebase | - Swift | - Git / Subversion | - Linux | Spanish (Native) |
| - React | - Shell Scripting | - GCP / AWS | | Japanese (Conv.) |

EXPERIENCE

Senior Flutter Engineer, Qvin

March 2022 – Present

- Implement Figma UI designs into an interactive mobile and web user experience using Flutter.
- Create and establish continuous integration tasks and deployment pipelines for a leading women's health mobile application available on both Google Play and Apple App Store.
- Ensure high code coverage in unit, widget, and integration tests.
- Perform deep codebase migrations for legacy projects. Including upgrades to the latest Flutter versions, null-safety, and modern state management solutions (BLoC)

Lead Mobile Engineer, Last Interactive (Self-employed)

March 2020 – Present

- Develop high-quality web, mobile app, and game experiences for small business clients

Software Engineer, Real-Time Technology Solutions

March 2017 – October 2019

- Designed and developed administrative functionality for QuerySurge project, agent, and notification management that interfaced with several distributed systems; Full-Stack, J2EE / Spring Framework.
- Spearheaded the development of JDBC drivers used to automate data testing across varying data sources like NoSQL databases, flat files, Microsoft Excel sheets.
- Served as internal Linux expert and knowledge base regarding Linux OS and scripting tasks.
- Provided tier-3 product support for enterprise customers both domestically and internationally.
- Assisted in the Spanish localization and live translation for both QuerySurge documentation and sales/support calls.

EDUCATION

Sept 2021

Western Governors University

Bachelor's Degree in Software Development
